

## ASSIGNMENT-1

1)

- a. List of users:

The screenshot displays the AWS IAM console interface. At the top, there's a navigation bar with the AWS logo, 'Services' dropdown, a search bar, and user information 'kamble vinod'. A blue banner at the top right announces 'Introducing the new Users list experience'. The left sidebar shows the 'Identity and Access Management (IAM)' menu with options like Dashboard, Access management (including Users), Access reports, and Service control policies. The main content area is titled 'IAM > Users' and shows 'Users (0)'. It includes a search bar, a table with columns for User name, Groups, Last activity, MFA, Password age, and Active, and a message 'No resources to display'.

- b. user details:

Set user details

You can add multiple users at once with the same access type and permissions. [Learn more](#)

User name\*

kiran

Add another user

Select AWS access type

Select how these users will primarily access AWS. If you choose only programmatic access, it does NOT prevent users from accessing the console using an assumed role. Access keys and autogenerated passwords are provided in the last step. [Learn more](#)

Select AWS credential type\*

☒ Access key - Programmatic access

Enables an **access key ID** and **secret access key** for the AWS API, CLI, SDK, and other development tools.

☒ Password - AWS Management Console access

Enables a **password** that allows users to sign-in to the AWS Management Console.
